Your feedback is critical!

The Youngstown Business Incubator has partnered with Team NEO, JobsOhio, and MAGNET to start The Ohio Additive Manufacturing Mapping Project (OAMMP) and your feedback is critical to advance the Additive Manufacturing industry across Ohio.

The OAMMP has been established to develop an asset map for additive manufacturing, including printers, post-processing, testing, and other capabilities. The goal is to establish Ohio as the epicenter for additive manufacturing in North America by creating a statewide cluster to support the growth of the industry. Your response will help us understand your business’ capabilities, as well as to identify any other strategic partners/customers in the state.

This project is part of JobsOhio, the public/private partnership that supports economic development in the state of Ohio.

This survey will take about 10 minutes to complete and all of the information will be kept CONFIDENTIAL.
